Capturing and uploading video to YouTube on an iPad

Capturing video on the iPad

1 Select the *Camera* app from the homepage.

2 Within the app, make sure you have selected the video option by *swiping up anywhere in frame*.

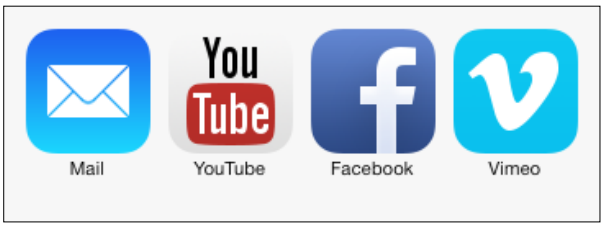
3 To start recording tap the red *Record* button. Tap the same button to end recording.

Uploading your video to the class YouTube Channel

1 Press the home button on the iPad to return to the home screen, where you can select the *Photos* app.

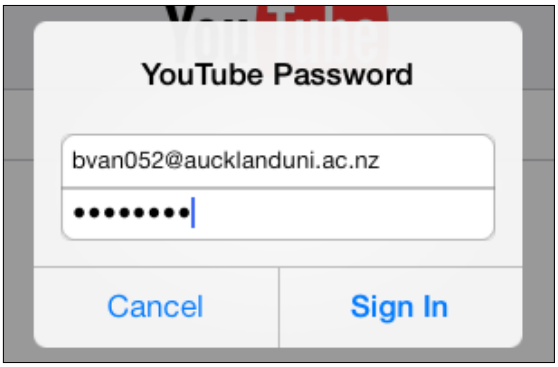
2 Select the video you just filmed, and in lower menu bar select the share icon as highlighted below:

3 Select *YouTube* from the pop up menu.



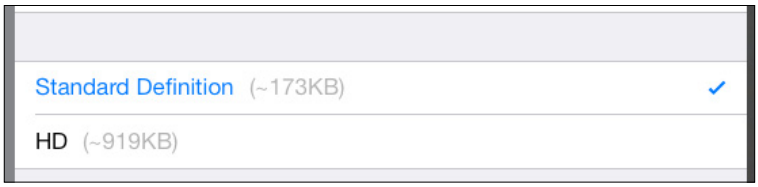
Capturing and uploading video to YouTube on an iPad

4 Log in to the class YouTube channel with either the login the lecturer has provided or using your EC mail address.



5 Fill in the appropriate information for you video if you wish (title, description, tags, category). A title is required, the other fields are optional.

- You can also select to upload the video in *Standard Definition* or *HD* (High-definition). For this class we recommend selecting *Standard Definition* as the video file is smaller and will upload more quickly.



- Make sure to tick *Unlisted* if you do not want this video to be visible to the general YouTube public. You will still be able to view your video by logging into the class account, or providing a specific link to the video.

6 The video should continue uploading in the background even if you continue to use other apps in the meantime, however we recommend staying in the *Photos* app and leaving the iPad cover open, as the upload may be disrupted if the iPad goes to sleep.

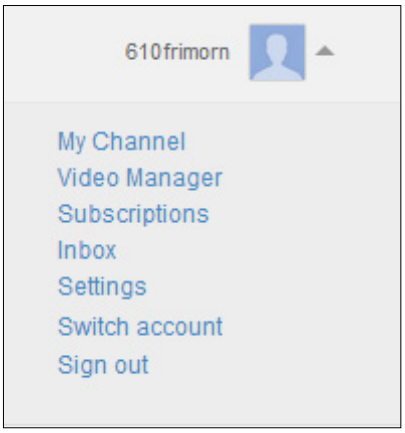
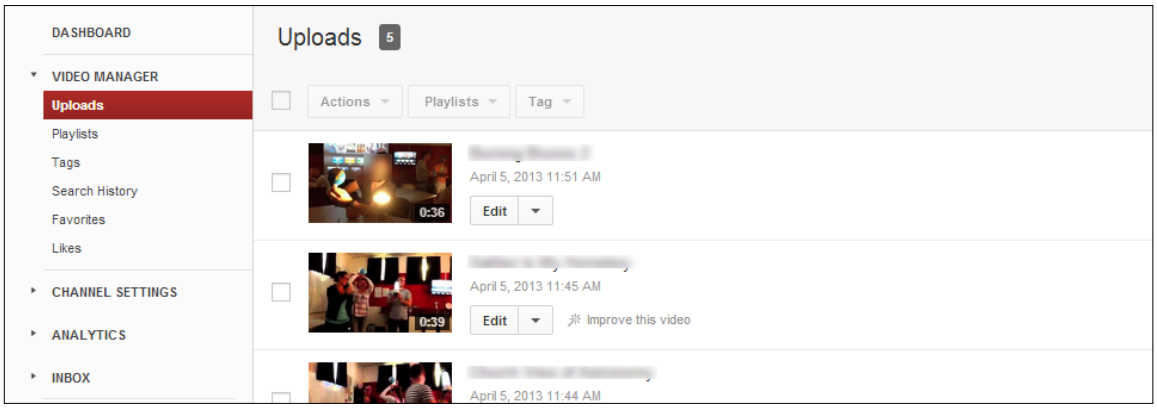
Viewing your uploaded video away from class

You will be able to view this video, and others from your stream, from YouTube (*www.youtube.com*) at any time.

1 Log into the class account using the same username and password you used when uploading the video (the *Sign In* button is at the top right-hand side of the YouTube homepage).

Once logged in, click the downward arrow next to your stream's username (top right-hand side of page) to reveal a number of options. Select *Video Manager* from the drop-down tab.





2 You will now be able to view all of the videos that have been uploaded to your stream.
